# Promultis 5D Sensory Solution

immersive, interactive sensory system for special needs

The Promultis 5D Sensory Solution combines high technology with simple design to provide a low cost, mobile, immersive sensory system for special needs, hospitals, physical or social rehabilitation. The Promultis 5D Sensory Solution offers floor or ceiling projection that responds to body movement when it is detected by the overhead camera. With a mood room lighting control the Promultis 5D Sensory Solution creates a complete sensory environment by allowing even those with very limited movement to alter many aspects of their immediate environment.

Any image, video and audio file can be added to the many effects available to build up a structured sequence specifically targeted at each learner. Teachers or therapists can design a programme around a pupil's specific needs and link it to a swipe card for re-use at a later date. Multiple users can be added to the system and programmes can be changed by the simple swipe of a card. With in-built wheels the Promultis 5D Sensory Solution can easily be moved from room to room.

The camera head lowers for easy access through doorways. The Promultis 5D Sensory Solution is also available as a fixed installation for floor, wall or ceiling projection.

The Promultis 5D Sensory Solution projects multiple themes and images which are combined with in-built stereo speakers and amp for excellent audio effects. A range of stimulating interactive and colourful games includes 'Splat the Insects', 'Scatter the Stars' and 'Whack-a-Mole'. The high-brightness projector can be mounted to project images onto the floor or ceiling making the system ideal for users who may be in a bed or wheelchair as well as those who are standing or lying on the floor.

# Promultis 5D Sensory Solution Micro

## Ultra-portable interactive sensory system

The Promultis 5D Sensory Solution Micro is the newest product in Promultis' interactive range and is one of the the smallest, most portable interactive floors available. The Promultis 5D Sensory Solution Micro creates colourful, engaging floor projections that respond to, and interact with, body movement.

Lightweight and easy to move from room to room the Promultis 5D Sensory Solution Micro offers instant 'plug and play' operation with no set up required and is ideally suited for use in a classroom, or at home.

Simple to operate, the Promultis 5D Sensory Solution Micro is supplied with click-together, portable, foam flooring so the interactive surface can be used in any room and can be relied upon to deliver a bright, colourful projection. Weighing only 1.7kg and easy to install, this system transforms any floor, in a domestic or educational setting, into a fun, immersive and interactive environment.

The Promultis 5D Sensory Solution Micro software and high brightness projector create multiple themes and images which are combined with in-built speakers for audio effects.

With thousands of pictures and hundreds of videos and sounds on-board, any image or audio file can also be added to the many effects available enabling teachers or parents to customise programmes for individual users.

A range of stimulating interactive and colourful themes includes 'Splat the Balloons', 'Scatter the Flowers' and an interactive fish pond.

The Promultis 5D Sensory Solution Micro is approximately the size of a shoebox and has a maximum projection size of 125cm x 95cm (160cm diagonal). The low cost Promultis 5D Sensory Solution Micro is ideal for any school or home environment.

The Promultis 5D Sensory Solution Micro package includes a full training manual.

# Promultis 5D Sensory Solution Mini

portable, interactive sensory system

The Promultis 5D Sensory Solution Mini combines new technology with simple design to provide an affordable, fully portable system for use in schools or at home. The Promultis 5D Sensory Solution Mini creates colourful, engaging floor projections which respond and interact to body movement. The Promultis 5D Sensory Solution Mini creates a complete sensory zone by allowing even those with limited movement to alter many aspects of their immediate environment.

Any image, video and audio file can be added to the many effects available enabling teachers or parents to design specific programmes for individual users.

The Promultis 5D Sensory Solution Mini can also be used as a stand alone DVD player, projecting onto the wall, to create a spontaneous, temporary activity zone ideal for venues where children need to be kept entertained.

Being the size and weight of a medium sized suitcase the Promultis 5D Sensory Solution Mini can be moved easily from room to room, carried upstairs or transported by car.

The Promultis 5D Sensory Solution Mini is simple to operate. A full training manual and telephone support is provided as part of the package.

Promultis 5D Sensory Solution Mini software and high brightness projector create multiple themes and images which are combined with in-built speakers and amp for excellent audio effects. A range of stimulating interactive and colourful themes includes 'Splat the Balloons', 'Scatter the Flowers' and an interactive fish pond. With the addition of its unique DVD projection feature the low cost Promultis 5D Sensory Solution Mini is ideal for any school or home environment.

Contact us for further information or to arrange a demonstration of any of our innovative, interactive systems.
