**Do you require eye catching multi-touch point of sale, wayfinding or digital signage for your reception area or exhibition stand? If so then the tablet like Promultis Totem 3 is perfect for you.**

Versatility combined with style and technology from shopping malls and university wayfinding solutions, to restaurant ordering and airport timetables, the Promultis Totem 3 gives you a whole world of possibilities.

Infra-red cell imaging technology uses a thin metal frame overlay and projects an array of LED beams which cross each other vertically and horizontally. This allows detection of any input, including a finder, gloved finger, stylus or pen.

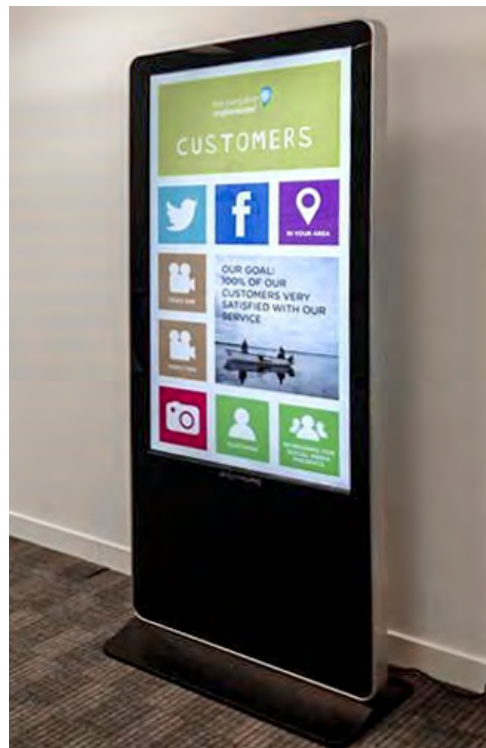

### Promultis Interactive Digital Signage Solutions

Connecting brands and services to your audience in real time and include payment options such as credit card terminals. Incorporate QR codes to communicate with consumers digital devices. Data transfer to and from devices via wireless technology and capture analytic data for marketing and data warehousing.
