Advanced Side Menu

Tapping on the briefcase icon on the simple side menu will bring up this advanced side menu. From here, you can choose two apps to split screen, add a child lock, turn the screen off, take a screenshot, start a screen recording, magnify a section of the screen, set a timer, access the camera (disabled for this totem), and add more apps to this section. You can also adjust the brightness and volume from here, turn the totem off, switch to PC, and access the settings menu.

NOTE: The default password for the childlock is 2580 or 0000.
